

F&O Sniper -- Signal P&L Backtest

Capital base Rs 200,000 | 1 resolved trades (0W / 1L / 0 flat) | 1 day span | generated 2026-08-23

■ Small sample -- treat everything below as a rough first look, not a verified edge. Same caution as every other backtest in this project.

NET P&L

Rs -150

-0.07% of capital deployed -- the bottom line everything else here explains.

WIN RATE

0.0%

0 of 1 trades profitable. A low win rate can still be profitable -- check Profit Factor too.

PROFIT FACTOR

0.0

Total Rs won / total Rs lost. Above 1 = profitable overall, above 1.5 is solid.

MAX DRAWDOWN

N/A

The single worst peak-to-trough decline anywhere in this data -- the real pain of the roughest stretch.

SHARPE RATIO

N/A

Return per unit of total volatility. Above 1 is good, above 2 very good. Needs 2+ days of data.

SORTINO RATIO

N/A

Like Sharpe, but only penalizes downside swings. Usually reads higher than Sharpe.

CALMAR RATIO

N/A

Annual return relative to the worst drawdown -- return earned for the pain endured.

CAGR (ANNUALISED)

N/A

What this rate would compound to over a year. N/A under a week of data -- too short to annualize honestly.

Profit vs Loss Breakdown

Net P&L above is profit minus loss combined into one number. This breaks both sides out separately, so the losses aren't hidden inside the net figure.

Gross Profit (all winning trades)	Rs 0
Gross Loss (all losing trades)	Rs -150
Best single trade	Rs -150
Worst single trade	Rs -150
Best single day	2026-08-21 Rs -150
Worst single day	2026-08-21 Rs -150
Currently underwater	No -- at or above the last peak

Equity Curve

Running account value after every trade, in the order each one actually closed. The dashed line marks where you started (the capital base above) -- above it means net ahead overall, below means net behind.

Drawdown %

How far below the highest point reached so far the account was at each moment, as a %. Always zero or negative -- 0 means sitting at a new high, a deep dip means a real losing stretch that hadn't recovered yet.

Performance by Segment

The same trades, split by Grade, Sector, OI Confirmation, and Pattern -- shows WHERE performance is concentrated instead of one blended number. A segment with very few trades (2-3) isn't a reliable read yet, even if its win rate looks extreme -- same small-sample caution as everywhere else in this report.

By Grade

Segment	Trades	Win Rate	Net P&L (Rs)	Profit Factor
Unknown	1	0.0%	-150	0.0

By OI Confirmation

Segment	Trades	Win Rate	Net P&L (Rs)	Profit Factor
Unknown	1	0.0%	-150	0.0

By Pattern

Segment	Trades	Win Rate	Net P&L (Rs)	Profit Factor
Gap up	1	0.0%	-150	0.0

By Sector

Segment	Trades	Win Rate	Net P&L (Rs)	Profit Factor
Unknown	1	0.0%	-150	0.0

Worst Drawdowns

The 5 deepest peak-to-trough declines in account value, worst first. 'Recovered' shows when equity climbed back to the pre-drawdown peak -- '--' means it hasn't yet.

No drawdown periods yet.

Daily Return Distribution

How many days landed in each return range. Red bars = losing days, green = winning days. A cluster of tall bars near zero with a few scattered further out is normal -- most days small, a few days big.

Monthly Performance

Total P&L for each calendar month. A month can only show one bar even if it had both winning and losing days inside it -- see Daily Return Distribution above for the day-by-day win/loss split.

Month	P&L (Rs)	Trades
2026-08	-150	1

Trade Log

All 1 resolved trades, most recent first.

Symbol	Action	Entry Time	Exit Time	Entry	Exit	Qty	P&L (Rs)	Reason
NIFTY	SELL	2026-08-21 15:33	2026-08-21 12:52	24283.00	24285.00	75	-150	End of logged history
